

Smalto sintetico per supporti difficili

Smalto sintetico di alta qualità per la protezione e la finitura di supporti difficili. Assicura ancoraggio e resistenza nel tempo. Non necessita di primer per la preparazione del fondo.

Synthetic enamel paint for difficult supports

Prime quality solvent borne enamel paint for the protection and finishing of difficult supports. The product features excellent adhesion with good resistance of the finish over time and does not require a primer for the surface preparation.

Peinture-laque pour supports difficiles

Peinture-laque de haute qualité, en phase solvant, pour la protection et la finition des supports difficiles. Assure un bon ancrage au support et une bonne résistance de la finition dans le temps. Le produit ne nécessite pas d'apprêt pour la préparation du support.

NON NECESSITA DI PRIMER NO PRIMER REQUIRED

Smalto sintetico per supporti difficili

Smalto sintetico di alta qualità per la protezione e la finitura di supporti difficili. Assicura ancoraggio e resistenza nel tempo. Non necessita di primer per la preparazione del fondo.

Campo di impiego:

- Specifico per lamiera zincate, ferro, leghe leggere, alluminio, rame, acciaio inox, vetro, plastica e PVC.

Preparazione del supporto:

- Una corretta preparazione del supporto garantisce i migliori risultati di resa, finitura e resistenza nel tempo.
- Pulire e sgrassare per rimuovere eventuale polvere o sporco. Non necessita di vernici di fondo.

Synthetic enamel paint for difficult supports

Prime quality solvent borne enamel paint for the protection and finishing of difficult supports. The product features excellent adhesion with good resistance of the finish over time and does not require a primer for the surface preparation.

Intended use:

- Specific for galvanized metals, Iron, light alloys, aluminum, copper, stainless steel, glass, plastic and PVC.

Surface preparation:

- The correct surface preparation of the substrate will guarantee the best results in terms of product yield, appearance and resistance in time of the finish.
- Clean and degrease the surface thoroughly to remove all possible traces of dust or dirt. No primer required for surface preparation.

NE NÉCESSITE PAS D'APPRÊT

Peinture-laque pour supports difficiles

Peinture-laque de haute qualité, en phase solvant, pour la protection et la finition des supports difficiles. Assure un bon ancrage au support et une bonne résistance de la finition dans le temps. Le produit ne nécessite pas d'apprêt pour la préparation du support.

Application:

- Spécifique pour tôle galvanisée e, fer, alliages légers, aluminium, cuivre, acier inoxydable, verre, plastique et PVC.

Préparation du support:

- Pour la France: se conformes au DTU 59.1.
- Une préparation correcte du support garantit les meilleurs résultats en termes de rendement, de finition et sa résistance dans le temps.
- Nettoyer et dégraisser la surface des traces de poussière ou de saleté et éliminer les parties non-adhérentes au support. Le produit ne nécessite pas d'apprêt.
